

eCommerce 1 Year Analysis

The Objectives

- There are 2 objectives of this analysis:
 1. Summarize the website's performance
 2. Provide insights to help client understand their website's performance
-

Quick Review of the Data

- Adds to Cart Dataset

- Year
- Month
- Number of additions to an online shopping cart

- Session Counts Data set

- Browser type (Safari, etc)
- Type of device (mobile, desktop, tablet)
- Date
- Number of sessions on webpage
- Number of transactions on webpage
- Quantity of items bought

Performance Summary

- From Jan 2013-June 2013 all key metrics saw a dramatic increase from the previous 6 months.
 - Sessions 19.9% increase
 - Transactions 21.8% increase
 - Quantity 23.2% increase
- Interestingly the AddToCart variable showed a decrease of 20.1%.

Insights

- It seems at the beginning of 2013 a new advertising strategy was put in place and was successful at driving traffic to the site.
- In addition the eCommerce Conversion Rate (ECR) has seen a small but positive trend since the beginning of 2013.
